

## THE FLORIDA NONPROFIT SECTOR: MORE THAN CHARITY

The nonprofit sector in Florida is large, diverse, and growing. Nonprofits are present in every county, bringing resources, services, and philanthropic dollars to local communities. These nonprofit organizations range from hospitals and universities to child day care centers and art galleries. Nonprofits create a caring community—one that strengthens and enhances the quality of life in our state.

Foundations and individuals in Florida express their confidence in our nonprofit sector through significant financial contributions and support. The strong presence of our 2,632 foundations in Florida and the generosity of Florida's citizens help our nonprofit organizations to meet the needs of our communities. Strong support from government, however, is crucial to the nonprofit sector as well.

Through this report, we hope to build appreciation for the essential role nonprofits play in Florida not just as service providers but also as employers; we seek to educate policymakers and the public about foundation and charitable giving; and we wish to cultivate support and strength within the established nonprofit community. The primary sources for these data are annual reports filed with the IRS by charitable nonprofits with over \$25,000 in gross annual receipts and employment records collected by the state's employment security office. Some of the highlights of the report are:

- The number of Florida's reporting charitable nonprofits grew by 81% from 1990 to 2000. In 2000, they had \$54.8 billion in total assets and almost \$31 billion in total expenditures.
- The largest proportion of charitable nonprofits are human service organizations.
- Almost 43% of the total—4,227 organizations—had annual expenses under \$100,000 in 2000.
- Charitable nonprofits in Florida paid over \$9.7 billion in wages in 2000.
- Florida's foundations held over \$13.6 billion in assets and gave almost \$831 billion in grants.
- The average charitable contribution of Florida's itemizers in 2000 was \$3,551.

Yet these numbers don't tell the whole story. In addition to the reporting 501(c)(3)s, there are at least three times as many organizations not required to file, including local PTAs, food kitchens, community theater troupes, and numerous other small organizations that are active in our communities, but whose limited finances exempt them from the IRS reporting requirement.

Nonprofit organizations also benefit Florida in ways that cannot easily be quantified: building community infrastructure, fostering civil society, and strengthening our social fabric. Each and every day, Florida citizens experience the strength of Florida nonprofits. FANO is pleased to present this report, in collaboration with the Urban Institute's National Center for Charitable Statistics and the Center for Civil Society Studies at Johns Hopkins University, to promote better understanding and appreciation of our state's nonprofit community.

President of FANO

*National Voice • State Focus • Local Impact*

### **MORE THAN CHARITY**

#### **Nonprofit organizations also:**

- Attract foundation and federal grants into the state.
- Help improve the work force. Many people gain valuable job training and work experience through volunteering with and working for nonprofit organizations.
- Frequently hire underemployed or unemployed workers and often reduce labor force inequalities by offering upward mobility to otherwise disadvantaged groups.
- Help to define the character of Florida communities and improve the quality of life. Active nonprofits prove to be strong incentives for remaining in or relocating to a given community.

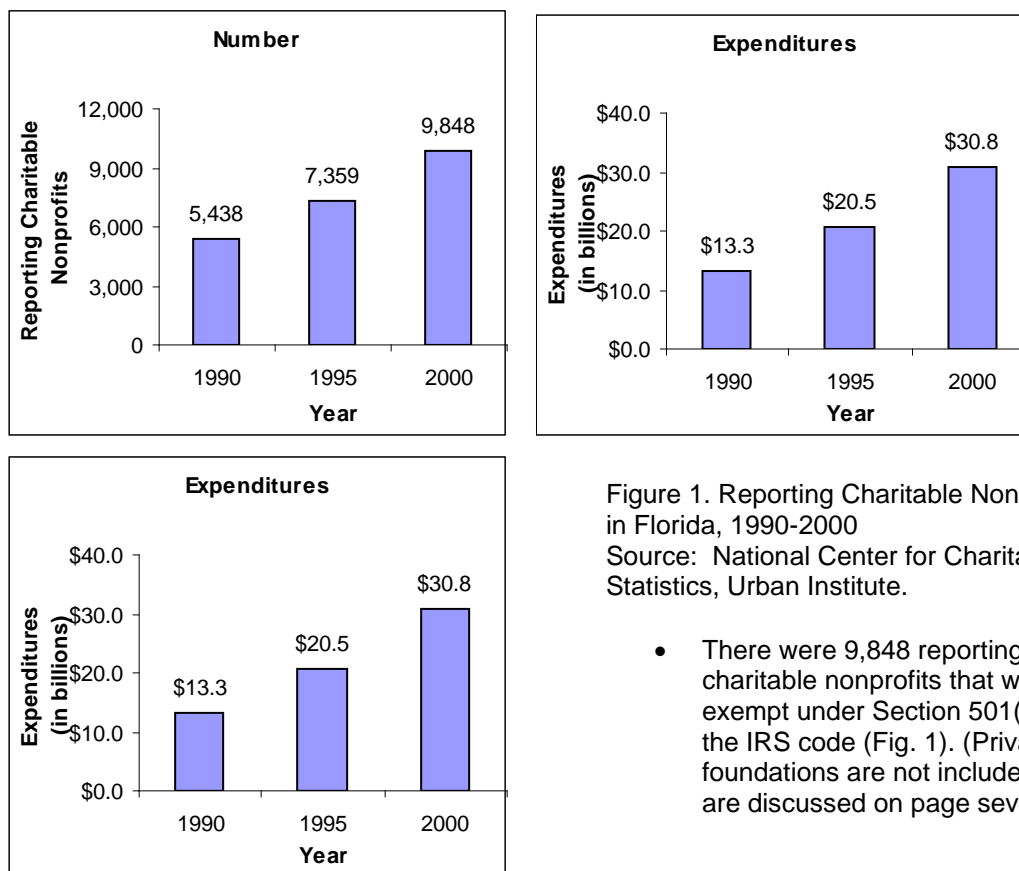

Figure 1. Reporting Charitable Nonprofits in Florida, 1990-2000

Source: National Center for Charitable Statistics, Urban Institute.

- There were 9,848 reporting charitable nonprofits that were tax-exempt under Section 501(c)(3) of the IRS code (Fig. 1). (Private foundations are not included but are discussed on page seven.

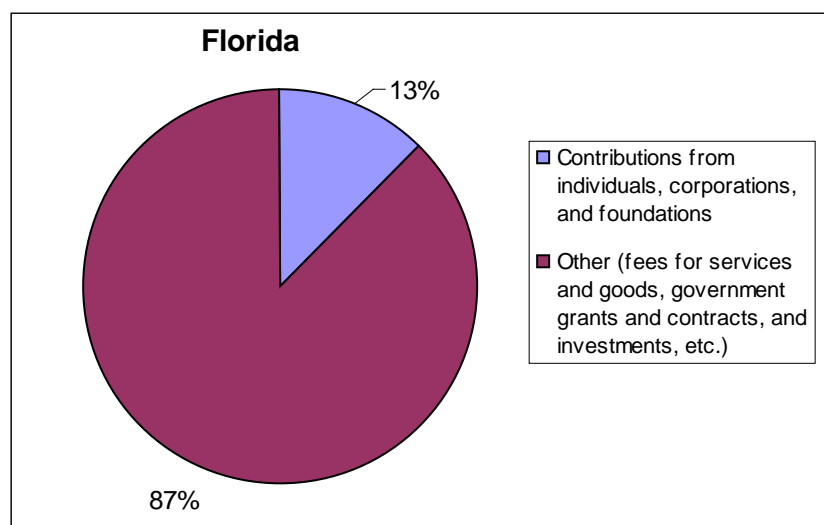

Figure 2. Sources of Revenue for Reporting Charitable Nonprofits, 1999

Source: National Center for Charitable Statistics, Urban Institute.

- About 13% of total revenues for reporting charitable nonprofits in Florida were from contributions made by individuals, corporations, and foundations (Fig. 2).
- The major source of revenues is fees and charges. Other sources include government support and investment income.

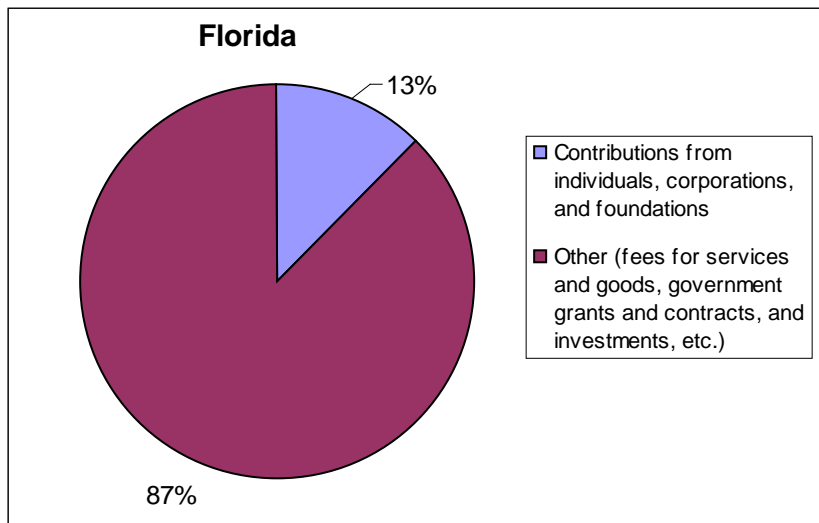

Figure 3. Reporting Charitable Nonprofits in Florida by Field, 2000  
Source: National Center for Charitable Statistics, Urban Institute.

- Human services organizations make up the largest proportion of Florida's reporting charitable nonprofits (34%). These organizations provide a broad spectrum of services including youth development, disaster relief, housing services, and family support (Fig. 3).
- Education is the second largest field, with 16% of the total (Fig. 3). The health care/mental health field is not far behind, representing 15% of all organizations.
- Religiously-affiliated charitable nonprofits that provide specific programs, such as mental health services or day care, are placed with organizations providing similar services, not under religious-related.

<b>Tax-Exempt Organizations</b>	<b>Registered with IRS (over \$5,000 in gross receipts)</b>	<b>Filing Annual IRS Report (over \$25,000 in gross receipts)</b>

501(c)(other)	1,751	1,917	
*Does not include religious congregations.			
**Filing Totals Based on Fiscal Year 2000			

Figure 4. The Florida Nonprofit Sector, 2000  
Source: National Center for Charitable Statistics, Urban Institute.

- Over 38,000 nonprofits are registered as tax exempt under 501(c)(3), but only one-third of them are large enough (over \$25,000 in annual gross receipts) to file an annual report with the IRS (Fig. 4).

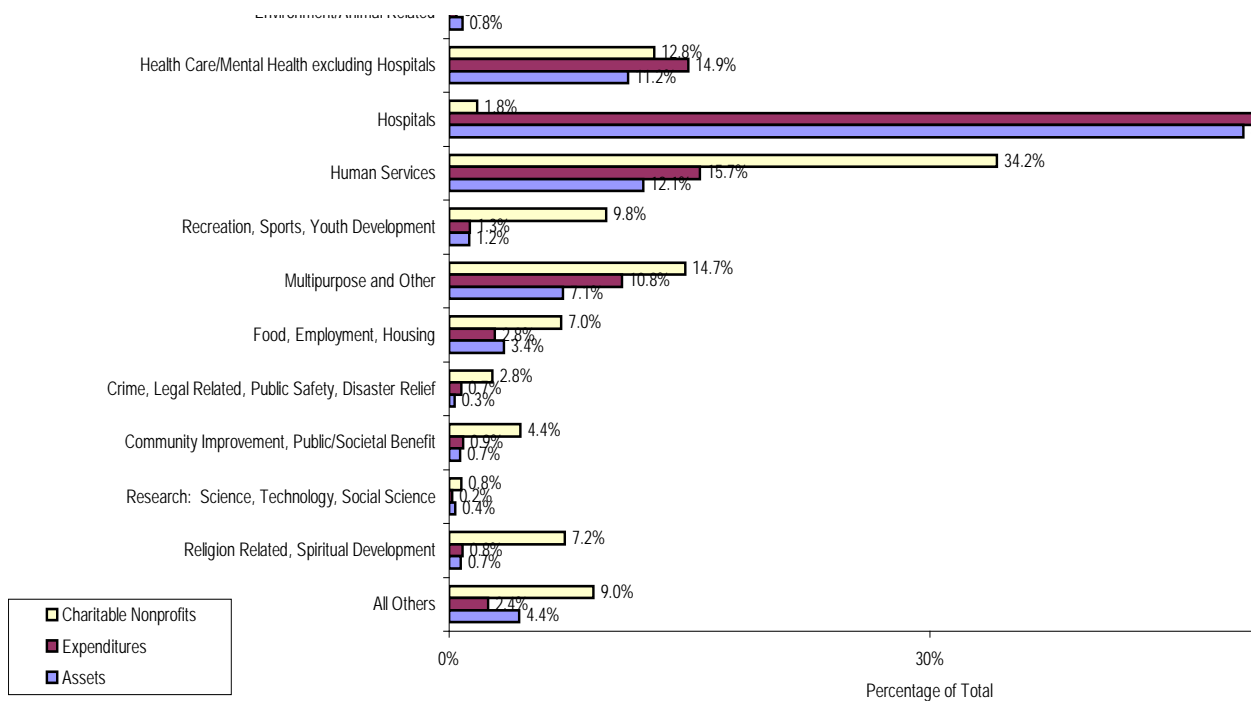

Figure 5. Number, Expenditures, and Assets of Reporting Charitable Nonprofits in Florida by Field, 2000  
Source: National Center for Charitable Statistics, Urban Institute.

- In 2000, Florida hospitals represented only 1.8% of total reporting charitable nonprofits, but they had more than half (50.6%) of total expenditures. Higher education institutions—0.4% of total reporting organizations—had expenditures of 7% (Fig. 5).
- Human services organizations, representing 34% of the total number, had less than 16% of total expenditures (Fig. 5).

Figure 6. Reporting Charitable Nonprofits in Florida by Expenditure Level, 2000  
Source: National Center for Charitable Statistics, Urban Institute.

- In 2000, only 6.3% of Florida's reporting charitable nonprofits (624 organizations) had annual expenditures greater than \$5 million. However, these organizations accounted for over 80% of total assets and 86.3% of total expenditures (Fig. 6).
- In contrast, 81.4% (8,017 organizations) had annual expenditures under \$1 million (Fig. 6).
- Not reflected in the chart are the 25,660 small charitable nonprofits registered with the IRS not required to file. This group includes organizations such as youth sports leagues and rescue squads.

## Appendix A

- Eight counties—Alachua, Broward, Dade, Duval, Hillsborough, Orange, Palm Beach, and Pinellas—have over \$1 billion in both total expenditures and total assets and represent 57.2% of nonprofits (Fig. 7./ Appendix A).
- Every county in Florida has at least one nonprofit organization (Fig. 7/Appendix A).

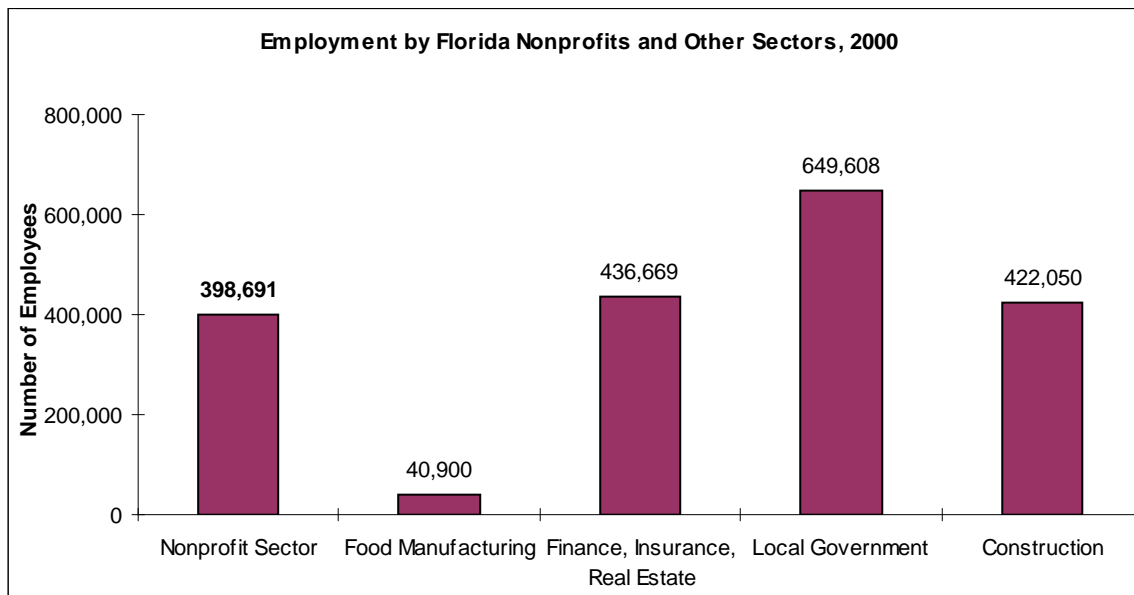

Figure 8. Employment by Florida Nonprofits and Other Sectors, 2000  
Source: Johns Hopkins Center for Civil Society Studies.

- In 2000, nonprofit organizations employed 398,691 people. Entities exempt under section 501(c)3 employed 352,739 people, approximately 5.0% of the state's labor force. By comparison, 501(c)3 organizations comprise about 7.0% of employment nationwide (Fig. 8).

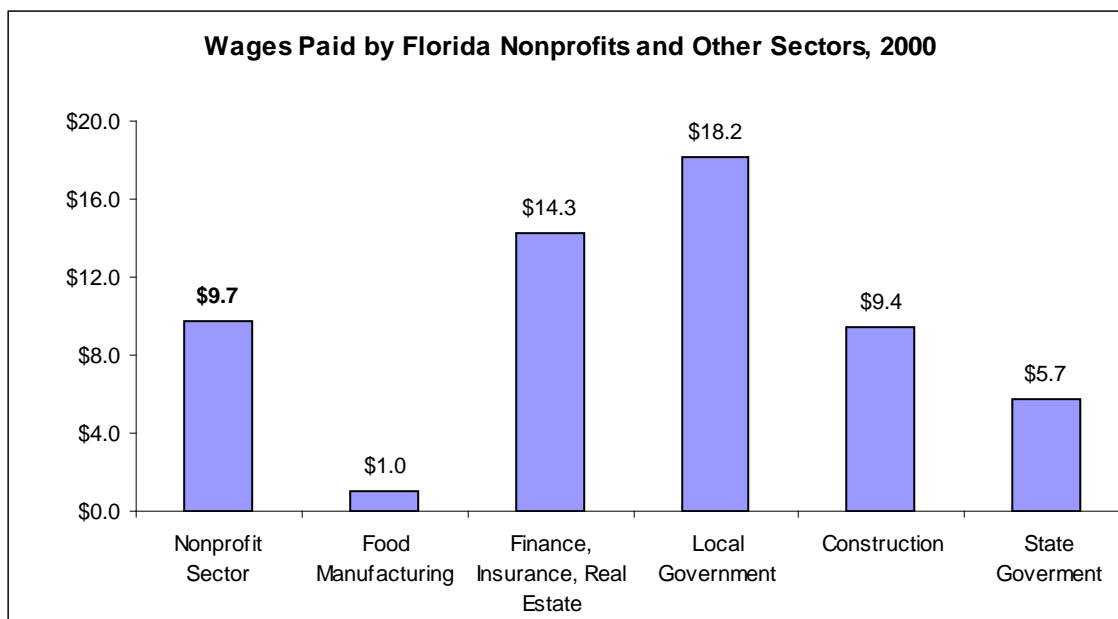

Figure 9. Wages Paid by Florida Nonprofits and Other Sectors, 2000  
Source: Johns Hopkins Center for Civil Society Studies.

- Nonprofit employees earned \$9.7 billion in wages, or about 5% of the state total (Fig. 9).
- This is approximately equal to the total wages paid in the state's construction industry, 70% more than the total wages paid to state government employees, and almost ten times more than the total wages paid in the state's food manufacturing industry (Fig. 9).

Figure 10. Nonprofit Employment in Florida by Field, 2000  
Source: Johns Hopkins Center for Civil Society Studies.

- The health field accounts for the largest proportion of nonprofit employment in Florida, as in other states. Approximately 53% of all nonprofit employees in the state work for health organizations (Fig. 10).
- Though significantly lower than health organizations, social service and education organizations account for the next largest components of the nonprofit workforce in Florida, with 17% and 14% of the employees, respectively. Social service organizations include services to individuals and families, day care, residential care, and employment and training. Education includes elementary and secondary education as well as colleges and universities (Fig. 10).
